Farben in Kulturgeschichte und Naturwissenschaft Gudrun Wolfschmidt, 2011 Warum ist der Himmel blau und bei Sonnenuntergang rot? Warum sind die Blätter grün? Farben prägen überall unser Leben. Wir leben in einem visuellen Zeitalter. Sind die Grundfarben Rot-Grün-Blau (RGB) oder Gelb, Rot, Blau (YMC)? Die Menschen empfinden im Allgemeinen eine große Freude an der Farbe. Das Auge bedarf ihrer, wie es des Lichtes bedarf. (Goethe: Zur Farbenlehre, 1810). 2010 feiert die Geschichte der Naturwissenschaften, Mathematik und Technik der Universität Hamburg ihr 50jähriges Jubiläum - Goethes Farbenlehre erschien vor 200 Jahren, daher wurde 2010 eine Ausstellung zum Thema Farben in Kulturgeschichte und Naturwissenschaft eröffnet. Zum Leben braucht der Mensch die Farbe. Sie ist ein ebenso notwendiges Element wie das Wasser und das Feuer. (Fernard Leger). Das Thema Farben (z.B. Pigmente, Maltechnik, Farbtheorien, Spektralfarben) ist sehr interdisziplinär - zwischen Geistes- und Naturwissenschaften - wie auch die Geschichte der Naturwissenschaften. Dies spiegelt sich auch im Inhalt des Buches und an der Gliederung der Ausstellung. Einerseits werden Farben von der Steinzeit, über die frühen Hochkulturen bis zur Antike sowie Farben in der Kunst und Kulturgeschichte präsentiert, andererseits werden Farben in den Naturwissenschaften (Astronomie, Physik, Chemie, Biologie und Geowissenschaften) sowie in der Mathematik, aber auch Farbwahrnehmung in der Physiologie, Neurowissenschaften und Psychologie behandelt

Farbpigmente, Farbstoffe, Farbgeschichten Stefan Muntwyler, Hugo Anthamatten, 2010 Summary: Das Buch (14-Farbendruck) schliesst eine Lücke im Literaturangebot, indem es sich auf die materiell-sinnliche Seite der Farben konzentriert und deren enorme Vielfalt in Bild und Text darstellt. Herzstück ist das Kompendium mit seinen 317 natürlichen und synthetischen Pigmenten und Farbstoffen, den in minutiöser Handarbeit hergestellten Farbmustern sowie den zugehörigen Grundstoffen: Mineralien, Erden, natürliche Substanzen oder chemische Formeln. Elf Farbgeschichten schildern die wechselvollen Wege von den ersten Farben der Menschheit bis zu den neuesten Entwicklungen der organischen Chemie. Daneben zeigen acht Pigmentanalysen von Kunstwerken, wie Künstler arbeiteten, sie zeigen Analysen von Werken aus den Epochen von Giotto bis Polke und runden den Gang durch die Welt der Farben ab. Exhibition: Gewerbemuseum Winterthur (12.9.2010-2.1.2011).

Aesthetic Essays Malcolm Budd, 2008-11-06 The book brings together a selection of Malcolm Budd's essays in aesthetics. A number of the essays are aimed at the abstract heart of aesthetics, attempting to solve a cluster of the most important issues in aesthetics which are not specific to particular art forms. These include the nature and proper scope of the aesthetic, the intersubjective validity of aesthetic judgements, the correct understanding of aesthetic judgements expressed through metaphors, aesthetic realism versus anti-realism, the character of aesthetic pleasure and aesthetic value, the aim of art and the artistic expression of emotion. Other essays are focussed on central issues in the aesthetics of particular art forms: two engage with the most fundamental issue in the aesthetics of music, the question of the correct conception of the phenomenology of the experience of listening to music with understanding; and two consider the nature of pictorial representation, one examining certain well-known views, the other articulating an alternative conception of seeing a picture as a depiction of a certain state of affairs. The final essay in the volume is a comprehensive reconstruction and critical examination of Wittgenstein's aesthetics, both early and late.

Figure Drawing Methods for Artists Peter Boerboom, Tim Proetel, 2017-07 Simple methods teach how to draw figures. When we try to draw a person, we are quickly confronted with various challenges. The proportions need to be correct, the attitude must be clear and vivid, the face should show resemblance and also be expressive. Such a task takes courage. Yet a little practice and training quickly lead to the ability to draw figures in a wide variety of styles. A figure in a particular posture can be assembled with a few key characteristic strokes. At the center of this collection is not the perfect figure, but the joy of drawing, and how, with simple methods, drawing people is possible: by reducing and reducing to a few lines, using clear contours and simple surfaces, the human figure emerges, constructed and elaborated.

Transmodern Christian Kravagna, 2022-10-11 How can we reconfigure our picture of modern art after the postcolonial

turn without simply adding regional art histories to the Eurocentric canon? Transmodern examines the global dimension of modern art by tracing the crossroads of different modernisms in Asia, Europe and the Americas. Featuring case studies in Indian modernism, the Harlem Renaissance and post-war abstraction, it demonstrates the significance of transcultural contacts between artists from both sides of the colonial divide. The book argues for the need to study non-western avant-gardes and Black avant-gardes within the west as transmodern counter-currents to mainstream modernism. It situates transcultural art practices from the 1920s to the 1960s within the framework of anti-colonial movements and in relation to contemporary transcultural thinking that challenged colonial concepts of race and culture with notions of syncretism and hybridity.

Bauhaus Women: A Global Perspective Elizabeth Otto & Patrick Rössler,2019-03-21 Forty five key women of the Bauhaus movement. Bauhaus Women: A Global Perspective reclaims the other half of Bauhaus history, yielding a new understanding of the radical experiments in art and life undertaken at the Bauhaus and the innovations that continue to resonate with viewers around the world today. The story of the Bauhaus has usually been kept narrow, localized to its original time and place and associated with only a few famous men such as Walter Gropius, Marcel Breuer, Paul Klee, Wassily Kandinsky, and László Moholy-Nagy. Bauhaus Women: A Global Perspective bursts the bounds of this slim history by revealing fresh Bauhaus faces: Forty-five Bauhaus women unjustifiably forgotten by most history books. This book also widens the lens to reveal how the Bauhaus drew women from many parts of Europe and beyond, and how, through these cosmopolitan female designers, artists, and architects, it sent the Bauhaus message out into the world and to a global audience.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert,Erma Hermens,Marja Peek,1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and

descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Colour Axel Buether, Anke Augsburg, 2014 Provides an introduction to the complex field of colour in terms of knowledge, research and practical applications. Topics covered include colour theory, the laws of colour harmony, the principles of colour perception and effect, and strategies for developing sound colour concepts in the design process --Front inside cover.

Visual and Written Culture in Ancient Egypt John Baines, 2007-05-17 A generously illustrated collection of John Baines's influential writings on the role of writing and the importance of visual culture in ancient Egypt. Investigation of these key topics in a comparative study of early civilizations is pursued through a number of case studies, and characterized by a radically interdisciplinary approach.

The Color Star Johannes Itten, 1986-10-15 Consisting of eight stencil-like disks that can be placed over Itten's color wheel to compare cool and warm values, complementary colors, and different hues and intensities, this useful and innovative tool helps designers explore a myriad of harmonious color.

Tempera Painting 1800-1950 Patrick Dietemann, Wibke Neugebauer, Heike Stege, Eva Reinkowski-Häfner, Renate Poggendorf, 2019 The papers and posters in this volume were presented at the conference 'Tempera painting between 1800 and 1950 Experiments and innovations from the Nazarene movement to abstract art held at the Doerner Institut, in cooperation with the Academy of Fine Arts, Munich. They explore the revival of tempera painting between 1800 and 1950 from the perspectives of art history, technical art history, conservation and scientific analysis.

Little Fox Edward van de Vendel, 2020-08-25 A Kirkus Best Picture Book of 2020 A beautiful, fully realized dreamscape. —Kirkus Reviews (starred review) Little Fox frolics with butterflies, scavenges for food, and searches for new friends—despite his father's warning that danger lurks all around. Then one day he takes a tumble, bumps his head, and starts dreaming of things that reflect both the beauty he's seen and the scary things he's heard. Marije Tolman's ingenious illustrations use a fresh technique that feels like a movie and a dream, starring the cheerful, bright orange Little Fox on grainy mixed media landscapes of blue and green. And when Little Fox wakes up, he's perhaps a little wiser, but still every bit as curious and full of life.

Solvent Gels for the Cleaning of Works of Art Dusan Stulik, 2004 The cleaning of a work of art often involves removing not only dirt and grime but also unwanted layers of varnish, gilding, and paint from the work's surface. The challenge for conservators lies in finding a cleaning agent that will act on one layer without affecting the layer being preserved and without leaving any harmful residues on the cleaned work. This book, which examines gel cleaning in the

treatment of paintings and painted works of art, presents the methodologies, data, and results of a collaborative project of the Getty Conservation Institute and Winterthur Museum. Among the issues covered are the theory and application of gel cleaning systems, the detection of residues left on the surfaces of objects cleaned with these systems, research into solvent-gel and solvent residues, stability of surfactants during natural and artificial aging, and recommendations for formulating gels for specific cleaning tasks.

Renaissance Mysteries: Proportion and composition Michael Price, 2017 The two volumes are an in-depth examination of a lost painting tradition. The books examine how the physical properties of natural and mineral pigments such as azurite, lapis lazuli, malachite, or cinnabar used by artists of the European Renaissance shaped a painting process in which each painting required a thorough plan or composition which began with the geometry of the format (i.e. the proportion of height to width of a rectangle) -- book cover.
